DIED AT HARBORVIEW / 30% TBSA FROM HOUSE FIRE

Kati Hulbert, RN, of Harborview Medical Center reported this case as the death of a 5-week old infant who sustained flame burns following a house fire.

According to records from Valley General Hospital, the decedent arrived in the Emergency Department via private car on May 18, 2009 at about 0900 hours with a diagnosis of "house fire - burned, 50% face, upper arms, chest". She was treated and subsequently transferred to Harborview Medical Center.

I transported the decedent from Harborview to the King County Medical Examiner's Office.
